Subject: request for routing air monitoring in LaFourche Parish and Grand Isle
Date: 05/17/2010 05:21 PM

Dave:

The REOC has made a request for the TAGA to conduct routine air monitoring tomorrow (5/18) along LA HWY 1, south of U.S. 90. Areas of interest are Galliano, Leeville, and Grand Isle. Local environmental groups are saying that they have strong odors in these areas. Please note that there is a toll bridge on HWY 1 below Leeville on the way to Grand Isle. This is an unmanned toll bridge and requires a toll tag that must be purchased at various vendors along HWY 1 to about Galliano, beyond Galliano they can not be purchased. This is a long trip (about 5 or 6 hours to Grand Isle) and will be about all you guys can do in a day. Questions or concerns, give me a call or email.

Warren
